

Goldman & Saloum Services

Information Technology

We work with clients in all industries to increase their competitive capabilities through information technology:

- ❑ **E-Commerce:** We can integrate e-commerce solutions with your existing business. We have developed e-solutions that allow clients to sell directly to consumers, interact with suppliers, and conduct internal transactions on-line.
- ❑ **Systems and Networking:** We offer traditional Local Area Network (LAN) Administration and support and integration of LANs with Internet services and Virtual Private Networking (VPN).
- ❑ **Document Management & Conversion:** We support, develop and implement a full range of web based Document Management Systems.

Goldman & Saloum Philosophy...

Goldman & Saloum approaches every project with the same four point philosophy:

- ❑ Solve the Right Problem
- ❑ Consider the Big Picture
- ❑ Apply Current Technology
- ❑ Deliver High Quality Work

Engineering and Manufacturing

We are Parametric Technology Corporation (PTC) resellers. We provide support, implementation, and customization for PTC Product Data Management (PDM) and Collaborative Product Commerce (CPC) technologies. This includes Pro/Engineer, Pro/Manufacturing, Drawing, Piping, Cabling, Pro/Process for Assemblies, Pro/Web-Publish, ECAD, Sheetmetal, Pro/Fly, Pro/PDM, Pro/Mechanica, and Windchill.

Strategy

Working with clients to set a new direction and implement the necessary organizational and functional changes to put in into action

Organizational and Strategic Leadership

Focusing on issues on the upper management agenda, such as strategically aligned organizations, transformation to e-organizations, role of corporate center, natural business unites, and shared services

Operations

We help clients succeed by focusing on innovation, value chain restructuring, the customer interface, and e-business strategies across the entire value chain

Organizational and Management

Focusing on change management, business process redesign, financial analysis, organizational transformation, and development

e-Business

We help organizations leverage digital technologies to achieve lasting competitive advantage and profit improvement by :

- ❑ Extending and enhancing reach to customers
- ❑ Improve efficiency
- ❑ Launching new businesses
- ❑ Redefining business and organizational models

e-Government

We help clients establish and deliver effective e-government with services spanning strategy, policy, and planning; IT investment management; customer relationship management; IT architecture development; web design and implementation; and information assurance.

We are committed to helping our clients achieve position of leadership in the market
